- 15.11 Instructions given by you or any Authorized Person to us shall be effective only upon actual receipt by us and shall be acknowledged by us unless we advise otherwise. If we do not acknowledge your Instructions, that Instruction is deemed not to have been received by us.
- 15.12 Subject to clause 15.4, you acknowledge that:
- (a) the processing and execution of Instructions will take place only if received by us within the Trading Hours and the relevant Service is available;
 - (b) the time required for us to process or execute, or to arrange for the processing or execution of, Instructions depends on the nature of the requested Virtual Asset Transaction, and it may not always be possible for Instructions to be processed or executed or requests effected by a specific deadline; and

- 16.3 You agree to pay any amount in the Fiat Currencies or Virtual Assets in which it is due in relation to the Virtual Asset Transaction, otherwise:
- (a) we may return the currency or asset and require you to make the payment in the appropriate and due Fiat Currencies or Virtual Asset and charge you for the Costs incurred in returning the payment to you; or
 - (b) we may convert the amount into the due Fiat Currencies or Virtual Asset on a date and at rates we reasonably consider appropriate and deduct Costs incurred in the conversion.
- 16.4 You understand and agree that to the extent any Taxes are payable in connection with your payment, you must pay us an additional amount equal to the payment multiplied by the appropriate rate of Tax at the same time as making the payment.
- 16.5 You agree that you are not entitled to any refund of any Costs, fees, or interest you have paid, including where you cancel a Virtual Asset Transaction, or where the Agreement is terminated in part or in full.
- 16.6 You must pay us an amount specified by us in relation to the transfer or movement of a Virtual Asset on its

underlying network or DLT, including for the purpose of settling a Virtual Asset Transaction or delivery to an address as part of the Services. If we determine that the Costs incurred by us in relation to such transfer or movement may exceed the specified amount, you agree that we may estimate the Costs and deduct a sufficient amount from your Account to cover our Costs in full, provided that we will rebate you any difference in the event our estimate exceeds the actual Costs incurred by us.

- 16.7 Unless otherwise indicated, you undertake to pay interest to us in respect of any debit balance on the Account(s) at any time at the interest rate of eight (8) per cent per annum on the overdue amount when we ask. Such interest shall accrue on a day-to-day basis and shall be payable on the last day of each calendar month or upon any demand being made by us.
- 16.8 We may cancel, reverse or debit any payment we make under the Agreement (including any interest paid) and make any corresponding adjustments to an Account in certain circumstances, including to correct a mistake; if we have not received cleared and unconditional Fiat Currencies and/or Virtual Assets in full and promptly; or if we have reasonable grounds for doing so.

17. SETTLEMENT

- 17.1 You must have an available and sufficient amount and appropriate type of Fiat Currencies and/or Virtual Asset in your Account to meet your obligations under the proposed Virtual Asset Transaction, inclusive of any applicable fees, Costs and Taxes, before you can place an order to enter into a Virtual Asset Transaction.

- (a) pay cleared funds or deliver Fiat Currencies or Virtual Assets to us; or
 - (b) otherwise ensure that we receive such Fiat Currencies or Virtual Assets,

- 17.3 Unless otherwise agreed in writing by us, you agree that if you fail to make such payment or delivery of Fiat Currencies or Virtual Assets pursuant to clause 17.1, we are hereby authorized to, without further instruction or sanction from you:
- (a) In the case of a purchase transaction, to transfer or sell any such purchased Virtual Assets to satisfy your obligations to us; or
 - (b) In the case of a sale transaction, to borrow and/or purchase such sold Virtual Assets to satisfy your obligations to us.
- 17.4 In order to settle a Virtual Asset Transaction and applicable fees, Costs and Tax in full without set off, counterclaim or deduction or withholding (including on account of any Tax) unless the deduction or withholding is required by Applicable Law, you acknowledge we may transfer any Fiat Currencies and/or Virtual Asset from your Account.
- 17.5 All delivery of Virtual Assets to you under a Virtual Asset Transaction will be rounded down in the manner specified and published by us on the Website and/or the App. You acknowledge that we may retain any excess amounts arising from such rounding.
- 17.6 Provided we act in good faith and in a commercially reasonable manner, we may refuse to accept or make any delivery of Fiat Currencies and/or Virtual Assets from or to you, such as refusing to accept, settle or make any delivery of Virtual Assets that do not meet the criteria of an Eligible Virtual Asset,

or where you have insufficient Fiat Currencies or Virtual Assets recorded in your Account.

- 17.7 All payments due under these Terms and Conditions must be made without deduction or withholding for any Tax, unless that deduction or withholding is required by Applicable Law, in which case you must pay such greater amount which, after the required deduction or withholding, will result in us receiving the amount which we would have received if the deduction or withholding was not required.
- 17.8 We may be required to withhold payments to you and to pass such amounts to a Government Authority. If at any time any relevant Government Authority requires us to make a deduction or withholding on any payment due to you, you agree to immediately reimburse us for the amount of any such deduction or withholding. You will indemnify us against any Loss we suffer or incur as a result of such deduction or withholding.
- 17.9 In the event that the availability or transfer of Fiat Currencies or any Virtual Asset is restricted in a particular jurisdiction, or we are otherwise unable to pay in a particular Fiat Currencies or Virtual Asset, we may make the payment in any currency or asset we reasonably consider appropriate and use a rate we consider reasonably appropriate.

18. SET OFF, LIEN AND OTHER RIGHTS

- 18.1 Without prejudice to our rights under these Terms and Conditions, we may at any time and without notice to you set-off any amount we owe you against any amount that you owe us or, where more than one person constitutes the client, that any one or more of those persons singly or jointly owes us (in either case, whether or not the obligation is matured or contingent and irrespective of the currency, asset or place of payment). Any amounts that are so set-off will be discharged promptly and in all respects.

 - (b) all your monies, assets, receivables and other property (whether held by you either individually or jointly with others) held by or in the possession of us at any time, other than any property that may give rise to any obligation to disclose an interest on our part, shall be subject to a general lien in favour of us as continuing security to offset and discharge all of your obligations, arising from the business of dealing in Virtual Assets or otherwise, to us and any of the Group Members.
- 18.3 If, on any day, you and us have payment and delivery obligations in the same Fiat Currencies or the same Virtual Asset in respect of two or more Virtual Asset Transactions, then we may elect for such Fiat Currencies to be paid or such Virtual Asset to be delivered, on a net basis so that such obligations will be automatically satisfied and discharged. If, in respect of the same Fiat Currencies or the same Virtual Asset, the aggregate amount that would otherwise have been payable by one party exceeds the aggregate amount that would otherwise have been payable by the other party, such payment and delivery obligations will be replaced by an obligation upon the party by which the larger aggregate amount would have been payable to pay to the other party the excess of the larger aggregate amount over the smaller aggregate amount.

25.6 Any notice or other communication so dispatched or made shall be deemed to have been received:

(a) if sent by email:

You agree that all such records are admissible evidence, and you shall not challenge or dispute the admissibility, reliability, accuracy or the authenticity of the contents of such records merely on the basis that such records were incorporated and/or set out in electronic form or were produced by or are the output of a computer system, and waive all of your rights (if any) to so object.

- (c) Virtual Assets may or may not be Securities. Some Virtual Assets may not circulate freely or widely, and may not be listed on any secondary markets.

1.2 Risk of Virtual Assets trading

- (a) Virtual Assets are highly risky and you should exercise caution in relation to Virtual Assets.
- (b) The prices of Virtual Assets may fluctuate, sometimes dramatically. The price of a Virtual Asset may move up or down, or may become valueless.
- (c) The volatility and unpredictability of Virtual Assets may result in significant losses over a short period of time.
- (d) Transactions involving Virtual Assets are irrevocable. Once a transaction has been verified and recorded on a blockchain, losses due to fraudulent or accidental transactions will not be recoverable.

- (f) Virtual Assets are relatively untested products and there is considerable uncertainty about their long-term viability which could be affected by a variety of factors including, amongst others, discovery of wrongful conduct, market manipulation, change to the nature or properties of the Virtual Asset, legislative and regulatory changes or other factors.
- (g) During the suspension of trading of the Virtual Assets, users cannot buy and sell units in the trading platform. In terms of providing a fair and orderly market with regarding the interests of users, the trading platform may suspend the trading whenever it is appropriate. If the trading is suspended, the subscription and redemption of such Virtual Assets or securities may also be suspended.

1.3 Virtual Assets may be complex products

Virtual Assets may be complex products by virtue that the terms, features and/or risk are not understood due to the complex structure, novelty and reliance on technological features.

1.4 Market, liquidity and conversion risk

The value of Virtual Assets may be derived from the continued willingness of market participants to exchange Fiat Currency for the Virtual Assets which may result in the potential for permanent and total loss of value of the Virtual Assets should the market for them disappear. There is no assurance that a person who accepts a Virtual Asset as payment will continue to do so in the future.

There is a possibility that you may not be able to sell or convert your Virtual Assets immediately or, in instances where conversion is possible, this may be at a loss. Such liquidity risk may be caused by the absence of buyers, limited buy/sell activity or underdeveloped secondary markets.

1.5 Certain events may impact Virtual Asset Transactions

There may be circumstances in which you may not be able to liquidate a position in the Virtual Assets. For example, Network Events, Airdrops or Forks may impact your ability to conduct a Virtual Asset Transaction. Information in respect of such events may be difficult to ascertain ahead of time.

1.6 Foreign exchange and foreign exchange control risk

- (a) Where a Virtual Asset Transaction is denominated in a particular Fiat Currency other than your primary reference asset, there is a risk that if the exchange market moves against you, then prior to, or upon the closing of the position, the net proceeds may be significantly less than the initial amount in your primary reference asset, and any income or gains may be entirely negated.
- (b) You may suffer Loss as a result of depreciation of the value of the Fiat Currency paid as a result of foreign exchange controls. Repayment or payment of amounts due to you may be delayed or prevented by exchange controls or other actions imposed by Government Authority over the Fiat Currency which they control or regulate.

1.7. Fees and other charges

All Virtual Asset Transactions executed in pursuance of your Instructions are subject to a transaction fee and any other fees, charges, commissions, and Costs that the Company from time to time may impose. Before you begin to trade on our platform, you should obtain a clear explanation of all fees and other charges for which you will be liable. These charges will affect your net profit (if any) or increase your Loss.

1.8 No right under statutory protection schemes

- (a) Virtual Asset Transactions are not covered by the protection offered by the Investor Compensation Fund established under the SFO (irrespective of the nature of the Virtual Assets).
- (b) Virtual Assets may not enjoy the same protection as that conferred on Securities under the SFO, the Securities and Futures (Client Securities) Rules (Cap. 571H) and the Securities and Futures (Client Money) Rules (Cap. 571I).
- (c) Without limiting clause 7.5 of Part 1, any Virtual Assets or Fiat Currency held in an Account are not protected deposits, and are not protected by the Deposit Protection Scheme in Hong Kong.

1.9 Risks of your assets received or held outside Hong Kong

Virtual Assets and Fiat Currencies received or held by the Company and/or the Custodian outside Hong Kong are subject to the Applicable Laws and regulations of the relevant overseas jurisdiction which may be different from the SFO and the rules made thereunder. Consequently, such assets may not enjoy the same protection as that conferred on other assets received or held in Hong Kong.

2. SPECIFIC OTC TRADING RISKS

2.1 OTC Transactions

OTC Transactions may involve increased risks since it may be difficult to liquidate an existing position, determine a fair price or assess exposure to risk.

2.2 Counterparty risk

You are subject to our counterparty risk under an OTC Transaction. You should cautiously consider whether it would be in your best interest to enter into OTC transactions with us and seek independent professional advice if in doubt.

3. VIRTUAL ASSET ISSUER RISKS

3.1 Offering documents or product information

The offering documents or product information provided by the issuer of a Virtual Asset have not been subject to scrutiny by any Government Authority, unless expressly stated otherwise. You should exercise caution in respect of any issuance or offer of such Virtual Assets.

For any Virtual Assets that have been authorised by a regulator, authorisation does not imply any official recommendation or endorsement of the asset by the regulator, nor does it guarantee the commercial merits of the asset or its performance.

3.2 Issuer default risks

Users should read the applicable terms, information and risk disclosures provided by the applicable issuers carefully before entering into any virtual asset transaction. Investors should note that the offering document or product information provided by the issuer have not been subject to scrutiny by any regulatory body.

In the event that a virtual asset issuer becomes insolvent and defaults on their issued products, users will be considered as unsecured creditors and will have no preferential claims to any assets held by the issuer. Users should therefore pay close attention to the financial strength and credit worthiness of securities issuers and conduct their own assessment on the potential of their project. Since Virtual Assets are not legal tender and virtual asset products are not backed by assets or any government and authorities, in the event of issuer bankruptcy or ceasing of operations, their tokens issued may no longer have any value and investors can lose their entire investment. We make no representations or warranties about whether any virtual asset will continue to trade in the trading platform.

Any Virtual Asset is subject to delisting without prior notice in the sole discretion of us. Investors should seek independent professional advice before making any investment decision.

4. CYBERSECURITY AND TECHNOLOGY-RELATED RISKS

4.1 Distributed ledger technology

DLT used in Virtual Assets is a relatively new, untested and evolving technology. Such experimental

technology poses risks including (but not limited to) technical flaws in technology and development, instability in future viability, decreased community or miner support, mining attacks, majority-mining and/or targeting by malicious persons.

4.2 Disruption to Services as a result of reliance on the internet and other technologies

The nature of Virtual Assets means that any technological difficulties experienced by the Company may prevent you from accessing your Virtual Assets.

Virtual Asset Transactions rely heavily on the internet and other technologies. Any significant disruption in our information technology systems, or any of the DLT networks we support, could adversely impact on your ability to use our Services.

Our systems, that of our third-party service providers and partners, and certain Virtual Asset and DLT networks may experience service interruptions or degradation because of reasons such as hardware and software defects or malfunctions, distributed denial-of-service and other cyberattacks, insider threats or other events. In addition, extraordinary trading volumes or site usage could cause our computer systems to operate at a slow speed or even fail. If any of our systems, or those of our third-party service providers, are disrupted for any reason, our Services may fail resulting in, amongst others, unanticipated disruptions, slower response times, delays and failures in the execution of your Virtual Asset Transaction.

In addition, the public nature of the internet means that parts of the internet or the entire internet may be unreliable or unavailable at any given time. No authentication, verification or computer security technology is completely secure or safe. The internet or other electronic media are an inherently unreliable form of communication, and such unreliability may be beyond our control. Any information transmitted, or communication or transaction made, over the internet or through other electronic media may be subject to security breaches. In case security is compromised, the information transmitted, communication or transaction may be exposed and result in reputational, monetary and other harm. Reliance on the internet also means that the information transmitted, communication and transaction may be vulnerable to interruption, transmission blackout, delayed transmission due to data volume, internet traffic, market volatility or incorrect data transmission or stoppage of price data feed.

4.3 Cyberattacks and fraudulent activity

The nature of Virtual Asset Transactions and our Services means that they may be the target of malicious cyberattacks and exposes them to an increased risk of fraud and cyberattacks.

These risks include (but not limited to) distributed denial of service, sybil attacks, phishing, social engineering, hacking, smurfing, malware, double spending, majority-mining, misinformation campaigns and spoofing.

Although we have developed systems and processes designed to protect the data we manage, prevent data loss and other security breaches, there can be no assurance that these security measures will provide absolute security or prevent breaches or attacks. Any fraudulent activity, cyberattack or technological difficulty may affect have an adverse impact on your Virtual Assets or information relating to you.

4.4 Forks and attacks

Virtual Assets may be subject to Forks or attacks on the security, integrity or operation of the networks including Network Events. Such events may affect the features, functions, operation, use or other properties of any Virtual Asset, network or platform.

Virtual Assets may also be vulnerable to exploitation of vulnerabilities in smart contracts and other code, as well as to human error.

The events may severely impact the price or value, function and/or the name of any Virtual Assets, or even result in the shutdown of the network or platform associated with the Virtual Asset.

4.5 Concentration risk

At any point in time, one or more persons may directly or indirectly control significant portions of the total supply of any particular Virtual Asset. Acting individually or in concert, these holders may have significant influence, and may be able to influence or cause Forks or Network Events which may have a detrimental effect on price, value or functionality of the Virtual Assets. Network Participants may make decisions that are not in your best interest as a holder of Virtual Assets.

4.6 Fraudulent transactions in Virtual Assets are not recoverable

Malicious entities may target you in an attempt to steal or to claim any asset you may hold. This may involve unauthorized access to your Account or any Account-related details, as well as unauthorized access to your computer or other devices that you may use.

You alone are responsible for protecting yourself against such actions. Transactions involving Virtual Assets are irrevocable. Lost or stolen Virtual Assets generally will not be retrievable.

4.7 Loss of private key is permanent and irreversible

You alone are responsible for securing your private key in respect of any address with respect to Virtual Assets not received nor held by us and/or the Custodian in an Account.

Losing control of your private key will permanently and irreversibly deny you access to your Virtual Assets. Neither we nor any other person will be able to retrieve or protect your Virtual Assets not held by us and/or the Custodian in an Account. Once lost, you will not be able to transfer your Virtual Asset to any other address or wallet. You will not be able to realize any value or utility that the Virtual Asset may hold now or in future.

4.8 Cryptographic advancements

Developments in cryptographic technologies and techniques pose security risks to all cryptography-based systems including the Virtual Assets, your Account, our Services and any of the Agreed Communication Methods. Applying these technologies and techniques may result in theft, loss, disappearance, destruction, devaluation or other compromises of the Virtual Assets, the Account, the Services, any of the Agreed Communication Methods or your data (as applicable).

5. TAX RISKS

The tax treatment of Virtual Asset Transactions is uncertain and may be subject to the tax laws and regulations in the relevant jurisdiction. As the tax treatment of Virtual Assets is relatively new and untested, you should seek independent professional advice in case of uncertainty.

6. REGULATORY RISKS

6.1 Regulatory risks in respect of Virtual Asset Transactions

Residents, Tax residents or persons having a relevant connection with certain jurisdictions may be excluded from carrying out Virtual Asset Transactions. Changes in the Applicable Law may adversely affect the use, transfer, exchange and value of Virtual Assets or result in you violating any legal or regulatory requirements of your applicable jurisdiction.

You are responsible for ensuring that any Virtual Asset Transaction is, and remains, lawful in case of changes

to the Applicable Law.

6.2 Regulatory risks in respect of DLT

The regulatory regimes that govern DLT and Virtual Assets are uncertain and new regulations or policies may materially affect the development and value of the Virtual Assets. Regulations are also likely to evolve rapidly depending on the interest of Government Authorities and the rigor of regulations varies significantly among jurisdictions. The effect of regulatory and legal risk is that any Virtual Asset may decrease in value or lose all of its value due to legal or regulatory change.

7. CONFLICTS OF INTEREST

We may be acting as agents for you as well as principals against you. We may facilitate the initial distribution of Virtual Assets, secondary market trading, or both, in manners similar to a traditional exchange, alternative trading system or securities broker. If these operations are not under the purview of any Government Authority, it would be difficult to detect, monitor and manage conflicts of interest.

8. INFLATION RISKS

Virtual Assets may, either because of the inherent design of the Virtual Assets or through Forks, Airdrops or Network Events, not be a fixed supply of assets. Where additional Virtual Assets are created, their price may decline due to inflationary effects of the increased amount of total Virtual Assets available.

9. COUNTRY RISKS

If a Virtual Asset Transaction is made in respect of virtual assets issued by a party subject to foreign laws or transactions made on markets in other jurisdictions, including markets formally linked to a domestic market, recovery of the sums invested and any profits or gains may be reduced, delayed or prevented by exchange controls, debt moratorium or other actions imposed by the government or other official bodies. Before conducting any Virtual Asset Transaction, the users should satisfy themselves as to the sufficiency of their understanding of any rules or laws relevant to the particular Virtual Asset Transactions.

Users should note that their local regulatory authority will be unable to compel the enforcement of the rules of regulatory authorities or markets in other jurisdictions where the investor's transactions have been affected. It is the sole responsibility of the investor to obtain independent advice about the different types of redress available in both the user's home jurisdiction and other relevant jurisdictions before starting to trade. If the user's country of residence imposes restrictions on Virtual Asset Transactions, we may be required to discontinue your access to the Account, and may not be permitted to transfer Virtual Assets back to you or permit you to transfer Virtual Assets from the Account to yourself or others, until such time as the regulatory environment permits us to do so.
